# 10 big hopes for change in education

## 01. There is a new public conversation about education

**Launch a commission** on the future of education and learning in England that unites the needs and ambitions of learners, educators, employers, and parents.

## 02. All young people are set up to thrive in life not exams

**Renew the curriculum** in line with the OECD 2030 Learning Framework, which focuses on agency and the attitudes, knowledge and skills that learners need to fulfil their potential and contribute to the well-being of their communities and the planet.

## 03. There is a broader view and story of success for every child

**Redesign assessment** to measure what really matters, when it matters, in ways that put less pressure on learners and support learning rather than judging.

## 04. Every child can fall in love with learning and keep on learning for life

**Introduce a Lifelong Learning Portfolio** for every child to capture what they learn in different contexts, encourage them to find their passions, ignite the joy of learning, and invest in their learning for life.

## 05. Every child has the best possible start in life

**Recognise the crucial importance of early years** in shaping life chances by creating a cross-departmental Cabinet position responsible for increasing early years investment and driving evidence-based commissioning.

## 06. Multiple pathways through learning and into work are valued and supported

**Transform careers support** for the 21st Century to provide authentic, real-world experiences that build confidence, understanding, and skills to prepare students for life and work.

## 07. Professional learning is as important as student learning

**Elevate teaching** through significant investment in teacher training, on-going development, and systems of support for professional learning that rival the best in the world.

## 08. All schools are actively supported to improve and learn together

**Rethink the role of Ofsted** to encourage shared learning and action between schools, and collective responsibility for the success of all children.

## 09. Schools thrive as part of local learning ecosystems

**Develop a network of Local Learning Brokers** who work locally and regionally to support meaningful collaboration between schools, employers and the wider community.

## 10. Education is protected from short term politics

**Establish a National Agency for Learning**, run by experts from across the system, that determines joined-up education and skills policy and funding for the long-term interests of citizens and society.
